

CALL FOR SPONSORS AND SUPPORTERS

The 3rd CONNECT Congress at TUM, with its topic „*Connective Tissues in Sports Medicine*“ relates to the role of fascia from a clinical, molecular as well as a biomechanical standpoint, with the aim of strengthening the exchange and dialogue between different research and application fields. Our CONNECT Congress equally addresses scientists for connective tissue, sports medicine, physicians and coaches, to transfer latest scientific results into athletic and therapeutic practice. We anticipate an audience size of about 400 participants.

Become a part of this prominent event!

We welcome sponsorship or support from companies, organizations, associations and foundations that wish to showcase products and services and network with fascia researchers, clinicians, exercise professionals and educators from around the world. The planned evening event “Meet & Eat” will offer all partners a unique possibility for networking and promotion.
